USA FREEDOM OF INFORMATION ACT REQUEST

Jan. 12, 2016

Dear FOIA director, EPA:

Please send me your records on the possibilities of oil spills, and their impacts (environmental economic, etc.), from the proposed oil traffic project in British Columbia by Kinder Morgan Transmountain, and the Canadian and American government and industry's ability to respond to such spills – records from my last request on this topic, i.e., April 9, 2015 to the present day. Reports, memos, correspondence, etc.

Also send me your comments on the process and procedures of Canada's National Energy Board as it takes input on hearings on whether to allow the Transmountain project - and your comments on their answers to your questions to NEB.

Also send me EPA notes on any other British Columbia energy project since April 9, 2015.

Please exempt me from fees, for I am a low-budget journalist working in the educational and historical interest. Do not send press clippings or records already public.

Sincerely yours,

Stanley Tromp, journalist
